Press Release

## **MCAE Systems as Meltio's Official Sales Partner to Boost Growth in the Czech and Slovak Metal Additive Manufacturing Markets**

MELTIO

MCAE

**Kurim (Czech Republic) and Linares (Spain)**—On **January 23rd, 2025**, [MCAE Systems](#) and [Meltio](#), a disruptive laser metal deposition technology manufacturer, announced that MCAE Systems will play a key role as an official sales partner in the distribution and support of Meltio metal 3D printing solutions in the Czech and Slovak markets.

Meltio offers a pioneering metal [3D printing solution](#) that enables industrial applications with a process built around welding wire, the safest, cleanest, and most affordable metal feedstock in the market.

MCAE Systems will focus on building a supportive ecosystem for [Meltio's technology](#) in the Czech and Slovak territories. It will partner with and drive business opportunities alongside technology centers, tooling machine companies, robotic integrators, academia, and industry.

*“In nearly 30 years of working with 3D technologies, we have built a strong position in the market and a deep understanding of our customers’ needs. The partnership with Meltio will allow us to combine many years of experience in both 3D printing and CAD/CAM and production on CNC machines and robots. Laser metal welding technology perfectly complements our wide portfolio of professional manufacturing technologies and we are convinced that it will open up new application possibilities in the field of metal 3D printing for our customers.”* says **Miloslav Drápela, CEO of MCAE Systems.**

**Francisco González, Head of EMEA at Meltio** highlights the significance of this partnership:

*“We are thrilled to be working with and this collaboration between MCAE Systems us serves as a great indicator of how Meltio’s partner ecosystem and our unique wire-laser metal 3D printing technology for industries is evolving in Czech Republic and Slovak markets booth our metal AM solutions in the east of Europe.”* And he added: *“Together, we will be able to cater to the ever-growing interest in Meltio’s technology and its applications for different industries and reliable metal applications.”*

### **About MCAE Systems**

MCAE Systems is a leading Czech technology company specializing in comprehensive 3D solutions for product development and manufacturing. For almost 30 years, it has been helping customers develop the most demanding projects and redefine product design and manufacturing processes. Thanks to the largest technology portfolio in the Czech and Slovak markets, including 3D printing, 3D scanning, CAD/CAM solutions, industrial metrology and augmented reality, the company brings innovative solutions to all industrial sectors - from quality control throughout production and design to dental and medical applications.

### **About Meltio**

Meltio takes metal additive manufacturing to the next level by developing high-performance, affordable, and easy-to-use metal 3D printing solutions using wire-laser metal deposition technology. The company’s mission is to delight customers, partners, and employees by pioneering the development of affordable metal 3D printing systems that are reliable, safe, and powerful, continually reinforcing their status as disruptors.
